Solution Overview

Problem Solved
Maintain consistent audit and compliance standards across their Microsoft 365 environment

Solution
EasyLife 365 Collaboration

Enabling Partner
HanseVision

M365 Products
Teams/SharePoint/Microsoft Groups/OneDrive

Munich Airport, a major European aviation hub, faced growing pressure to meet strict audit and compliance standards in its expanding Microsoft 365 environment. The airport sought a comprehensive solution to streamline governance and ensure efficient management of their Microsoft 365 assets.

Challenges

With a complex structure of teams, channels, and extensive file-sharing activities, ensuring consistent compliance became a significant challenge for the organization. The existing manual processes were time-consuming, prone to errors, and failed to provide the necessary oversight, leading to potential compliance risks and inefficiencies in managing data protection policies.

Solution

To address these challenges, their solution partner, **HanseVision**, turns to EasyLife 365 Collaboration, a comprehensive solution designed to bring order to chaos in the Microsoft 365 environment. EasyLife 365 streamlines maintenance and control through automated lifecycle management, covering all stages from asset creation to cleanup. Key features include:

- **Access Reviews:** Regular and automated reviews oversee ownership, team memberships, file sharing, and private channels, ensuring proper access control across the Microsoft 365 environment.
- **Comprehensive Policy Enforcement:** Automated application of crucial policies such as Archive Policies, Owner Policies (also for Guest Users), Audit & Compliance Policies, and File Sharing Policies is enabled.
- **Automated Lifecycle Management:** Simplifies the management of assets from creation to cleanup. IT administrators at Munich Airport establish precise rules and policies, while users independently manage their assets.
- **Provisioning and Post-Provisioning Actions:** Administrators configure Provisioning Actions for automated asset creation and setup, with Post-Provisioning Actions to optimize and manage assets post-deployment.

Munich Airport Enhances Audit and Compliance with EasyLife 365 Collaboration

Results

The implementation of EasyLife 365 Collaboration brings substantial improvements to Munich Airport's audit and compliance management. IT administrators set comprehensive rules and policies, while users seamlessly manage their Microsoft 365 assets with minimal oversight. Automated policies and controls reduce the time and effort required to maintain compliance and minimize the risk of errors. As a result, all activities within the Microsoft 365 environment adhere to the highest regulatory standards. Key outcomes include:

- **Enhanced Compliance:** Continuous enforcement of automated policies ensures full adherence to audit and regulatory requirements, significantly reducing the risk of non-compliance.
- **Increased Efficiency:** Automated workflows streamline processes, allowing IT teams to shift their focus from time-consuming manual checks to more strategic, high-value tasks.
- **Strengthened Data Security:** Robust access controls and strict file-sharing policies, combined with GDPR compliance and data encryption, fortify the protection of sensitive information.

> **"** *EasyLife 365 was the perfect fit for our needs. It seamlessly met our data protection and compliance requirements, transforming our collaboration concepts into a robust, efficient Microsoft 365 environment. The solution's technical implementation and ongoing refinements have greatly enhanced our operations and ensured we remain compliant and effective.* **"**
