Solution Overview

Problem Solved

Ambit Group needed an efficient, scalable way to manage the growing number of Microsoft 365 collaboration resources without overwhelming IT or compromising governance.

Solution

EasyLife 365 Collaboration

Enabling Partner

Experts Inside

M365 Products

- Teams
- SharePoint
- OneDrive
- Outlook
- Microsoft Groups
- Viva Engage
- Guest Accounts

Ambit Group, a Digital Business Enabler, faced increasing complexity in managing collaboration across its expanding Microsoft 365 environment. With a growing number of Teams, SharePoint sites, and guest accounts, the organization needed a comprehensive solution to enforce governance, reduce IT workload, and ensure sustainable digital collaboration.

Challenges

At the Ambit Group, collaboration with customers and partners is at the heart of every project. As a result, their Microsoft 365 environment quickly filled with Teams, SharePoint sites, and guest accounts. But with this growth came growing pains:

- Administrative workload surged for IT
- No clear governance standards across resources
- Inadequate lifecycle management using Microsoft's out-of-the-box features

Solution

To tackle these challenges head-on, Ambit Group joined forces with **Experts Inside** and implemented **EasyLife 365 Collaboration** bringing clarity, automation, and control to their Microsoft 365 environment.

How the rollout unfolded:

- **Evaluation & Fit:** Ambit Group evaluated Microsoft's built-in options and sought a more tailored solution. EasyLife 365, with full Microsoft 365 coverage and seamless integration via the Teams app, was the ideal match.
- **Guided Onboarding:** Experts Inside and EasyLife 365 supported Ambit Group with a fast-track **setup just one hour** to get their tenant live and configured with expert guidance.

- **Templates & Lifecycle Automation:** Standardized templates were introduced for project teams and common collaboration scenarios. Clear lifecycle rules were defined: the owners of the resources are now asked to check access at regular intervals. If resources are not used, they are automatically archived.
- **Pilot Phase:** During the pilot rollout, templates and governance policies were tested across real-life use cases. Thanks to the user-friendly interface and strong documentation, **full adoption took less than a month.**

Results

With EasyLife 365 and the support of Experts Inside, Ambit Group transformed their collaboration landscape:

- **Compliance Built-In:** Lifecycle rules and proactive access reviews ensure governance is always enforced.
- **Smart Automation:** Teams and SharePoint sites are now provisioned with predefined templates and the right add-ons. No more manual setups.
- **Big Time Savings:** Automation and Teams-integrated actions cut down IT workload dramatically.
- **Clean & Tidy Workspaces:** Inactive or abandoned resources are auto-archived.
- **Visibility & Control:** Every owner has a centralized view of their collaboration assets and the power to manage them in a few clicks.

“The introduction of EasyLife 365 is now helping us to manage our data efficiently and fulfil defined governance requirements. The collaboration with Experts Inside was smooth and the introduction of the tool was very clear and intuitive. Overall, it was a worthwhile investment that has significantly improved the way we work.”
